L'eleganza della luce

The elegance of the light

La versione su astina è un ampliamento della collezione. Il sostegno verticale è disponibile in più altezze per le rispettive configurazioni funzionali previste: 1, 2 o 3 teste. Ogni dettaglio è stato progettato per assecondare le prestazioni del micro-apparecchio, l'asta può ruotare a 360° sulla verticale. Allo stesso modo le sorgenti possono essere inclinate (0° - 90°) sull'asse orizzontale, permettendo di orientare facilmente il fascio luminoso sugli oggetti esposti esaltandone la magia. La serie fa dell'orientabilità e della compattezza i suoi maggiori plus che, unitamente alle finiture preziose e ricercate, rendono Nano Tini (sigla prodotto) il prodotto perfetto per il retail di alta gamma e i musei.

The version on bar is an extension of the collection. The vertical support is available in several heights for the respective functional configurations envisaged: 1, 2 or 3 heads. Every detail has been designed to accommodate the performance of the micro-appliance-the bar rotates 360° vertically. Similarly, the sources can be tilted (0° - 90°) on the horizontal axis, allowing you to easily direct the light beam on the objects on display, enhancing their magic. The series makes adjustability and compactness its major benefits which, together with the precious and refined finishes, make Nano Tini (product code) the perfect product for museums and high-end retail.
